PROJECTS

Redsync PH

Full Stack Developer

Davao City, Philippines
July 2025 – November 2025

- Architected and built a responsive web application for managing work plans, task progress, and project status
- Crafted clean, responsive UI components using Tailwind CSS to ensure consistency across devices
- Built interactive task management features (To-do, Ongoing, Done) with real-time updates for improved workflow visibility
- Integrated a real-time notification system to enhance team awareness and collaboration
- Mapped user flows and developed interface prototypes in Figma, improving usability and navigation
- Connected Firebase services for authentication and real-time data synchronization

Marian TBI Project Management Information System

Full Stack Developer / UI-UX Designer

Davao City, Philippines
June 2024 – November 2025

- Designed and delivered a centralized web platform to track incubatee progress, tasks, and resource requests
- Developed intuitive UI/UX designs in Figma, streamlining workflows for students and administrators
- Built responsive frontend interfaces with role-based access control (RBAC) and real-time notifications
- Created data-driven dashboards to visualize project progress, requests, and performance metrics
- Implemented real-time chat and notification features to improve communication and collaboration
- Reduced manual tracking processes by introducing automated reporting and centralized data systems

EXPERIENCE

University Management Information System (MIS)

Web Developer - Intern

Davao City, Philippines
January 2026 – Present

- Engineered a responsive Laboratory Information System interface using Laravel and Livewire for managing patient records and workflows
- Built frontend components and dashboards for data visualization, reporting, and system navigation
- Integrated authentication flows, RBAC, and interactive UI features to enhance usability and security
- Crafted user-centered UI/UX designs in Figma, improving accessibility and efficiency for staff
- Optimized frontend performance, reducing load times and improving data handling responsiveness
- Collaborated in a small development team, maintaining code quality using Git and VS Code

EDUCATION

University of the Immaculate Conception

Bachelor of Science in Information Technology, Healthcare Technologies.

Dean's List (2026), A Philippine University Scholar

Davao City, Philippines
2021 - 2026
